# COMPUTER INFORMATION SYSTEMS TECHNOLOGY

The Computer Information Systems Technology (CIS) program is designed to provide students with an in-depth understanding of the skills that will prepare them for careers in today's information technology (IT) field. The Certificate of Proficiency in Computer Information Systems provides the knowledge to configure and troubleshoot personal computers and make network connections. The Technical Certificate in Computer Information Systems further expand the students' knowledge and offer more focused pathway for continued learning.

This program is not just classroom-based; instruction takes place in a hands-on laboratory environment that provides real-world experience in applying the skills valued by employers.
