

# UACCM CAREER CENTER

## *DIESEL TECHNOLOGY*

The Diesel Technology program will prepare students for a career as a Diesel Service technician. The program focuses on the fundamentals of design, repair, and preventative maintenance of diesel engines and basic diesel systems. These systems include, engine performance, cooling systems, lubrication systems, induction exhaust and after-treatment systems, hydrostatic transmissions, charging systems, heavy-duty torque converters, power train principles, heavy-duty clutches, transport refrigeration, brake air systems, steering alignment. Technical skills will also be developed in advanced diagnostics and repair of engine and system controls. Students completing this program will be prepared to demonstrate knowledge of the skills necessary to diagnose, service, and repair different systems of Class 4 through Class 8 trucks and tractors.

Students have the opportunity to earn ASE Student Certifications in 4 different content areas: Diesel Engines, Electrical/Electronic Systems, Brakes, and Steering & Suspension.
